SKILLS

Frontend: HTML, CSS, Javascript,React JS-NextJS

Backend: Node.js

Programming Languages: Java

Database: MySQL, MongoDB

Cloud Platform: AWS

UI / UX Design

COURSEWORK

- Data structures and algorithm
- object-oriented programming

ACHIEVEMENTS

ACADAMIC
Women in Engineering Achiever for Problem solving -2023

CERTIFICATION
Google UX Design Professional Certificate
IBM&edunet front-end developer

EXPERIENCE

EDUNET | Frontend Developer Intern | Remote,India
04/23 - 06/23

- Developed a frontend for the Rentify web application, facilitating users to find the rental houses, and hostels based on their needed location.
- It helps owners find the correct tenants and also helps tenants find the correct house based on the key requirements
- Tech stack: MERN

VEE TECHNOLOGIES | Robotic process automation Training Consultant Intern | Salem, India
01/23 - 04/23

- Collaborated with cross-functional team to deliver training sessions and contributed to an invoice application of users' Billing amount data using RPA in-house automation tool botH
- Created an automated Bot for employees to log in and apply for leave & WFH with an accuracy of 90%
- Tech stack: Robotic process automation

PROJECT

AWS CLOUD COST OPTIMIZATION 02/24 – 03/24

- The Lambda function fetches all EBS snapshots owned by the same account ('self') and also retrieves a list of active EC2 instances (running and stopped).
- For each snapshot, it checks if the associated volume (if it exists) is not associated with any active instance. If it finds a stale snapshot, it deletes it, effectively optimizing storage costs.
- Tech Stack: AWS

POEMNEST 04/23 – 05/23

- Developed a Social Media Application for a Poem-Writing Community
- enhanced user engagement through various features. People can share their writing skills from their accounts with others, connect, follow other users, and command other people's posts.
- people create their scribble room, used to conduct a poem writing contest & add 50 participants
- Tech Stack: MERN

INNOVATIO 03/23 – 04/23

- Implemented a website for the hackathon INNOVATIO' 23 Willingness to Learn, conducted at Sona College of Technology.
- the website utilized to make the team registration for the student and the payment online
- introduced features such as student e-id generation for a registered team
- Tech Stack: ReactJS, Firebase
